## Pydantic Bundle Info Class

```
class BundleGlist(BaseModel):
    filename: str | None = None
    thumbnail: str | None = None
    display_name: str | None = None

class BundleInfo(BaseModel):
    model_config = ConfigDict(protected_namespaces=())
    model_name: str | None = None
    model_filename: str | None = None
    dimensions: freyr.pydantic.numpy_ndarray(shape=(3,)) | None = None
    bounding_box: freyr.pydantic.numpy_ndarray(shape=(2, 3)) | None = None
    bandpass: list[str] | None = None
    source: str | None = None
    source_location: str | None = None
    license: str | None = None
    description: str | None = None
    comment: str | None = None
    default_glist: BundleGlist | None = None
    random_glist: BundleGlist | None = None
    variant_glist: list[BundleGlist] | None = None
```

Help determine more efficiently which glist to use if a bundle folder path is provided as the targetBundle.

# Bundle Variance and Standardization

Anthony Guarino – Maverick Patronus

## DIRSIG Bundle Cleanup

Cleaned up existing bundles and created material variants for them.

Render of Cleaned Up Bundles with Variants

## New Maritime Bundles

Created new maritime bundles from CAD models

New Maritime Ships Rendered in DIRSIG

Type 039C Yuan Class Submarine

## Bundle Repository

Maverick / dirsig\_bundles

Source

master ... dirsig\_bundles /

Source

- Cars/Infiniti-g35

- Maritime
- Sentries/SA2-Guideline
- SmallPlanes
- Tanks
- Trucks

40+ sorted bundles with cleaned up standard format.

# Bundle Variance and Standardization

Anthony Guarino – Maverick Patronus

## Future Work

### Updating unit tests to reference from the new repository

```
import dirsig_bundles as db

def get_test_bundle_path(*paths, file_pattern=None):
    data_path = os.path.join(os.path.dirname(db.__file__), *paths)

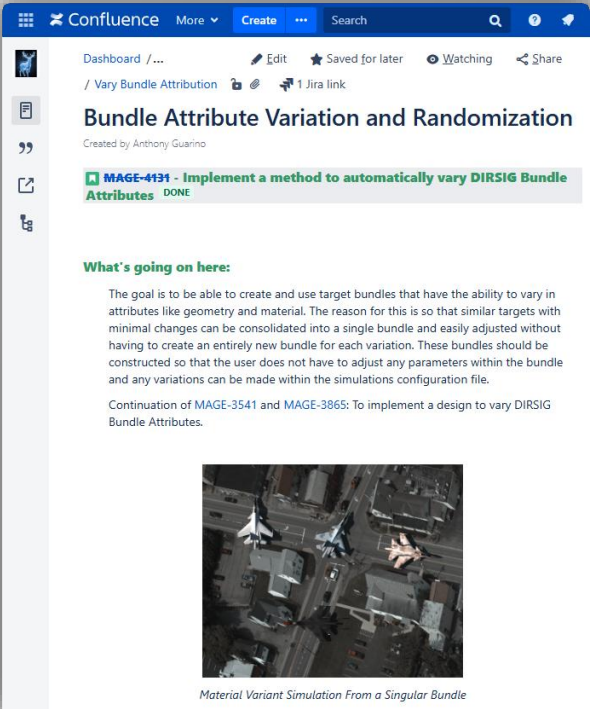

self.bundle = get_test_bundle_path("Trucks", "Truck-Blue_Gray_IR")

class TestConfigHelper(unittest.TestCase):
    def setUp(self):
        self.expected_x = -86.325786
        self.expected_y = 30.639069
        self.bundle_su_35 = get_test_bundle_path("FighterJets/FighterJet-SU35")
        self.bundle_su_35_glist = self.bundle_su_35 + "/FighterJet-SU35.glist"
        self.bundle_h135 = get_test_bundle_path("Helicopters/Helicopter-H135/"
                                                "Helicopter-H135.glist")
```

### Sort bundles by availability and confidentiality

### Update Documentation on Bundle Variance Process
